Motor Skills	fine motor skills
Sensory	tactile; visual
Cognitive	literacy
Materials	3/4" thick compression-molded UV-stabilized HDPE; stainless steel hardware
Colour Options	available in various colour schemes

OVERVIEW

The Braille-Clock playground panel is designed to be fun, educational and inclusive. One side features the Braille alphabet and numbers, while the other displays a clock with raised braille numbers, providing tactile play. Kids can feel the textured letters and numerals while moving the hour and minute hands to practice telling time. This interactive panel encourages sensory exploration, fine motor skills and early literacy and numeracy.
