Heights Available	74" max; requires multiples for decks higher than 46"
Type of Play	physical
Motor Skills	agility; coordination; lower body strength; motor planning
Materials	3/16" thick clear lexan; powder-coated steel; stainless steel hardware
Colour Options	available in various colour schemes

OVERVIEW

The Clear Nunatak is a transparent climbing wall made from durable clear Lexan. Positioned perpendicular to the platform, it encourages a lateral, side-entry approach while children climb using the built-in hand and footholds. The see-through design adds visual interest and play value, allowing kids to interact, make eye contact and communicate as they climb on either side.
