

Rope Stack

SPECIFICATIONS

Age Range	5-12yr
Heights Available	74"
Type of Play	physical
Features	climbing and clambering
Motor Skills	agility; coordination; lower body strength; motor planning
Materials	netform steel-enforced rope; powder-coated steel; stainless steel hardware
Colour Options	available in various colour schemes

OVERVIEW

The Rope Stack climber is a dynamic, columnar playground climber that takes kids from ground level to an elevated platform. Rope rungs suspended from a steel frame form a vertical tunnel, inviting children to scramble up the inside or along the outside. The slightly wobbly rungs add a fun wiggle factor, while the open-ended design encourages creativity and social interaction.
