Type of Play	physical
Features	climbing and clambering
Motor Skills	agility; coordination; lower body strength; motor planning
Materials	powder-coated steel; stainless steel hardware
Colour Options	available in various colour schemes

OVERVIEW

The Sidewinder climber puts a twist on the classic rung climber. With a 45° twist that creates an eye-catching visual effect, the Sidewinder challenges coordination and motor planning for a wide range of ages. This versatile climber works equally well as a ground-level component, connecting to other parts of a circuit, or as an elevated climber, taking users to platforms up to 74" high. The Sidewinder can be paired for double the fun (as shown).
