Design Options	rises to left or right
Heights Available	74" max
Type of Play	physical
Features	balancing activity
Motor Skills	balance; coordination; foot-eye coordination
Materials	durable anti-rust coated chain; powder-coated steel; stainless steel hardware
Colour Options	available in various colour schemes

OVERVIEW

The Sky Bridge link invites kids to leave the security of the platform and traverse along a rail while holding onto wiggly vertical chains for support. It features a full 180-degree curve “in the air” before looping back to the structure, rising 14" to the left or right. The elevated height adds a playful sense of risk, while the chains provide a dynamic “wobble factor”.
