Age Range	5-12yr
Features	accommodates multiple users; climbing activities
Motor Skills	agility; coordination; lower body strength; motor planning
Materials	netform steel-enforced rope; powder-coated steel
Colour Options	available in various colour schemes

OVERVIEW

With its three showy snow-capped peaks, the Triple Peak Climber climber makes a bold visual statement and entices kids to explore. Angled nets at various heights invite young adventurers to climb, clamber, hang or even perch atop the peaks. The Triple Peak creates physical challenge and fun for diverse ages and skill levels, challenging kids to test their strength and coordination as they navigate their way up, down, over or under this unique playground climber. Children who are unable to climb can still feel they are a part of the action as they make their way through the structure or try pulling themselves up on the rope from underneath.
