Motor Skills	balance; foot-eye coordination; lower body strength
Materials	durable anti-rust coated chain; powder-coated steel; stainless steel hardware
Colour Options	available in various colour schemes

OVERVIEW

The Wiggle Link component challenges kids to make their way from one platform to another using horizontal rungs suspended from chain, creating a fun “wobble factor” that kids love. Rising 28", it provides an engaging way to link a lower deck to a higher one, with handrails for extra support.
