Age Range	5-12yr
Motor Skills	balance; grip strength; upper body strength
Sensory	kinesthetic awareness; vestibular
Colour Options	available in various colour schemes

OVERVIEW

Blue Imp's Zoomerang playground zipline brings the thrill of ziplining to the school or community playground. This commercial playground zipline is a track-style zipline, robustly designed for heavy use in school playgrounds and community parks. Kids can step up the ramp to the starting platform, sit astride the comfortable rubber seat and zoom from one side to the other and back again. Playground ziplines not only offer an element of risk and get kids excited about going to the playground, but also improve balance and body control, as riders must maintain stability while in motion. The movement and speed of a playground zipline provides sensory input that can be beneficial for sensory processing. Ziplines at the playground promotes social interaction, as friends take turns riding the zipline or encourage each other.
